

Bright Stars CARES!

Providing a clean, safe and positive environment.

We have developed the Bright Stars Cares Program, specifically designed to provide a clean, safe and positive environment for all students, families and staff.

PROVIDING SOCIAL DISTANCING

- Encouraging drop off/pick up if your school age child is capable. For all students, we are allowing only 1 healthy caregiver to view classes.
- Designed a clearly marked gym layout to provide social distancing for our teachers and students while in class.
- Lowered our student to teacher ratio to ensure class management.
- Utilizing BioBlasting cleaning products to disinfect all surfaces throughout the day.
- Re-designed lesson plans that include the full curriculum, allowing for the safest traffic flow between classes.
- Our curriculum focuses on teaching techniques, drills and skills that can be safely done with little to no spotting from our instructors.
- Classes will continue to be productive and fun!
- We have scaled back our number of classes offered to fit the maximum occupancy loads recommended throughout the day.

INCREASED DISINFECTING PROTOCOLS

- Designed a cleaning and disinfecting system/schedule unique to our building and the customers we serve. This includes the use of BioBlasting cleaning solution and fogger system.
- Staff health screening including temperature checks and a completion of a questionnaire by our employees prior to their shifts.
- Installing plexiglass barriers at our customer service desks. Since we encourage online registration and payments, there is very limited customer touch interaction.
- Doubled the number of sanitation stations throughout the facility so all who enter to disinfect their hands regularly.
- Increased the number of sanitation stations in the gym to allow students and instructors can disinfect their hands regularly throughout and at the beginning and ending of class.
- Removed small teaching props that are difficult to be disinfected.
- Set up a schedule for our entire facility to be regularly disinfected even when we have classes in session, including disinfection of all equipment and mats.
